

GREEN CAR ⚡ CRXSS CODE

 ZenAuto

Supported by  Brake
the road safety charity

There are more electric cars than ever - which is great for the planet and reducing pollution...

But we also need to learn what to look out for when crossing roads with more electric vehicles.

That's why ZenAuto has teamed-up with road safety charity - Brake - to create the...

GREEN CAR CROSS CODE

It's based on road safety advice you've learnt already... So it's super easy to remember!

1

STOP!

First find the safest place to cross - make sure it's clear from any vehicles or charging points and cables that might obstruct you. Stand on the pavement near the kerb.

2

USE YOUR EYES & EARS!

Look all around for traffic and listen extra carefully for electric vehicles - which can be very quiet or sometimes don't sound like a car at all.

3

WAIT UNTIL IT IS SAFE TO CROSS!

If traffic is coming, let it pass.

4

LOOK & LISTEN AGAIN!

Keep your eyes and ears on the road, and be extra careful because electric vehicles are often capable of accelerating faster than other cars.

5

CROSS!

When it is safe, go straight across the road - do not run or walk diagonally.

6

ARRIVE SAFELY!

Remember to practice the Green Car Cross Code at home with your grown-ups, or at school with your teachers or take the quiz here at zen.auto/gccc
